DETAILED ACTION**Information Disclosure Statement**

It is noted that the listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered. In the instant case, Applicants are reminded and encouraged to provide the copies of the references listed in the specification.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, drawn to 1-13, drawn to a combined vaccine, a method of making and a method of preparing the vaccine comprising diphtheria (D), tetanus (T), pertussis (P) and haemophilus influenza type b (Hib) that is a non-lyophilized Hib capsular saccharide at the concentration less than 15 µg/ml.

Group II, claim(s) 14 and 16 in part, drawn to a vaccine and a method for using the same, wherein the vaccine comprises D, T, P, Hib and HBsAg.

Group III, claim(s) 15 and 16 in part, drawn to a vaccine and a method for using the same, wherein the vaccine comprise D, T, P, Hib and a polio antigen.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature of a combined vaccine comprising diphtheria (D), tetanus (T), pertussis (P) and haemophilus influenza type b (Hib) that

Art Unit: 1648

is a non-lyophilized Hib capsular saccharide at the concentration less than 15 µg/ml has been disclosed as evidenced by Eskola et al. (Lancet 1999, Vol. 354, issue 9195, pp. 2063-2068)

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
